

## DRESS2Market Fifth Project Meeting

Final DRES2MARKET project meeting was held in IMDEA Energy on January 19<sup>th</sup> 2023, in Madrid.

The main objective of the meeting was to review the principal project outcomes, in particular the recommendations for future integration of renewable energy sources to electricity networks and also for their access to energy markets. Also, the preparations for the final dissemination event took place and the review of all the project financial aspects and the state of the project deliverables.

Agenda and photos are below.

Hour	Agenda Point	Who
15:30 - 15:45	<b>Welcome of participants</b> A short review of the agenda by APPA Renovables, and overall project status	Lucía Dólera APPA Renovables
15:45 - 16:15	<b>Next day Conference</b> Review the agenda and organizing the presentations	APPA Renovables All
16:15 - 16:45	<b>Review the WP4 and WP5</b> Last steps to take into account	ICCS-NTUA IEN
16:45 - 17:15	<b>Last details to take into account for the final report</b> Review of the tasks planned for the final weeks of the project, costs of the project.	APPA Renovables All
17:15 - 17:30	<b>Wrap up and end of the meeting</b>	APPA Renovables

Finally, the participants visited Smart Energy Integration Lab where they were presented with a real-time demonstration of the voltage control solutions for distribution networks. The demonstration was successful and it initiated discussions on several important issues related with the solutions for future electricity networks.
